

MicroBattle Design Competition

Mycoplasma laboratorium - Synthia

In 2010, after much genetic and microbiological research and innovation, scientists created a new living organism, *Mycoplasma laboratorium*, lovingly called **Synthia**. It opens the door to designing new forms of life and Synthia is predicted to be important in the fight against climate change and other future crises.

SYNTHIA DESIGN COMPETITION

Draw your version of Synthia in the box below and send this sheet to us to be in with a chance of it being added to the game pack! The winner will also be sent a prize of a £50 Amazon voucher. Competition closes 5pm, 19th November 2021.
